a Veteran-owned small business

Manteio Vision

At Manteio Company, we **protect the vulnerable** and **evolve the global cyber workforce**.

Online (in)Security

Amidst the relentless cyber threat landscape, people find themselves locked in a perpetual protection struggle. We refuse to yield to the chaos. We stand as sentinels of cognitive and information security, wielding innovation as our weapon and resilience as our shield.

Protecting the Vulnerable

In the face of cunning adversaries, our resolve is unwavering. Through relentless transformative integration, we forge AI-based information security tools of unparalleled sophistication. **DarkScribe**, our deception detection tool, identifies and alerts on deceptive patterns found on the web, shielding vulnerable populations like the elderly from manipulative design and fraud. We arm individuals with tools and knowledge to safely navigate cyberspace.

Cyber Workforce Evolution

Our approach to cyber workforce evolution draws inspiration from the elegance of regenerative complex systems. By harnessing the power of interconnectedness, feedback loops, and emergent behavior, we cultivate an environment where growth is inherent, and innovation is perpetual.

Funding Stage: Pre-seed

Industry: AI Security

Market Size: \$1.5T - \$2T

Investment Sought: \$500K

Use of funds: Compensation, Software and Model R&D, License Purchasing, Computing Costs
